

A SCIENCE DRIVEN COMPANY

Declaration of Conformity

Per- and polyfluoroalkyl substances – known as PFAS, specifically perfluorooctanoic acid (PFOA) and perfluoro-octane sulfonic acid (PFOS), and their salts and structural isomers have been declared as hazardous substances. These substances are controlled and regulated by several international regulatory agencies including the U.S. EPA, ECCC and Health Canada.

This is to certify that Pounds of Plastic, do not use any PFAS substances in any of our thermoplastic resins. Pounds of Plastic is not using any of the bio-accumulative synthetic organo-fluorine chemical substances as part of components or as raw materials or in products.

Pounds of Plastic has never used and do not intend to import, manufacture or use PFAS and its salts, in any of our thermoplastic resin formulations.
